Semester: FALL / SPRING 20____

Secondary Education—Social Studies Assessment:
Student-Teacher Performance and Effectiveness

Directions: The **field supervisor**, in consultation with the **mentor classroom teacher**, should complete this assessment of the student-teacher **near the end of the student-teaching practicum**. Ratings should be based on the holistic assessment of the student-teacher’s *overall performance in the preparation and implementation of classroom lessons and effectiveness in achieving student learning outcomes* as evidenced by observations and teaching artifacts (such as those in the C I 495E portfolio).

Rating Scale:

S (3) = Observed Success (the student-teacher’s successful implementation of instruction and positive effect on student learning along the standard were evidenced during the practicum)

P (2) = Observed Potential (the student-teacher’s potential to provide instruction and improve student learning along the standard was evidenced throughout the practicum)

D (1) = Observed Difficulty (the student-teacher’s difficulty in providing instruction and improving student learning along the standard was evidenced throughout the practicum)

NO = Not Observed (there is insufficient evidence available to determine level of performance)

Across the totality of the practicum, the social studies student-teacher demonstrated ability to make connections in lesson design and teaching as well as to achieve positive effects on student learning along each of the **NCSS thematic standards** below, as appropriate to the Commonwealth of Pennsylvania’s Academic Standards for Civics & Government, Economics, Geography, and History (except 1.4 and 1.8, which are not in the Pennsylvania standards):
